Janus Remote Communications Announces Verizon Certification of the Terminus CDMA910CF v3.0

Aurora, IL – Janus Remote Communications, an industry leader in the design and manufacture of precision M2M products and solutions, is pleased to announce that their Plug-In Terminus CDMA910CF v3.0 has been certified for use on the Verizon cellular network.

The Plug-In Terminus CDMA910CF is a dual band, CDMA-1xRTT wireless communication module specifically designed for worldwide M2M network deployment. Easily integrated into any new or existing hardware applications via its standard DIP pin configuration, the CDMA910CF is a cost-effective solution for EVDO M2M connectivity. Users can choose to mount the CDMA910CF directly onto their PC Board or simply mount in a DIP socket or header.

The quick to market CDMA910CF v3.0 is ideal for use in M2M telemetry and Telematics applications including fleet and asset management, vending, security, health and safety, alarm monitoring, e-maintenance and many telemetry applications. Janus is proud to use Telit technology in the CDMA910CF Terminus.

Telit Communications PLC is a global provider of wireless machine to machine (M2M) technology and value-added services including connectivity cloud and PaaS Application Enablement Services. www.telit.com
