From: Janus Remote Communications

Subject: EOL Notification for EVDO910PS Janus POTSwap

Telit Communications recently announced the End-Of-Life and last time buy of DE910-DUAL modules used in Janus EVDO910PS POTSwap devices. Janus Remote Communications regrettably, in turn, announces the End of Life of our EVDO910PS v2.00 (Sprint) and EVDO910PS v3.00 (Verizon) POTSwap products.

Last Time Buy (LTB) service is extended to customers who acknowledge the end of life (EOL) notice by placing orders for a final quantity of EVDO910PS devices. Customers are asked to procure units to cover their future requirements with this LTB. The LTB date is the deadline for Janus to receive a Purchase Order (PO) for EVDO910PS devices.

LTB (Last Time Buy Order): December 1st, 2017.

Product Replacement

Janus Remote Communications is currently at work on 4G LTE versions of the POTSwap. The 4G LTE versions are anticipated to be replacements for all 2G and 3G POTSwap devices. More information will be available in Q4 2017. Visit our website for more information regarding POTSwap devices.
