LTE910CFX v1.00 4G Worldwide Embedded CAT1 Cellular Modem

Description

The Janus line of Common Footprint (CF) Embedded Modems are footprint compatible, embedded cellular devices for use in LTE communication networks globally. They were specifically designed to provide customers with cost effective modules that are easily integrated into new and existing designs, require limited customer certification resources, and are completely interchangeable to allow for maximum network flexibility while removing the worry of product obsolescence.

The LTE910CFX v1.00 Common Footprint (CF) Modem is an LTE Category 1 cellular modem with support for worldwide cellular networks.

Utilizing the Telit LE910C1-WWXD module as its cellular engine, the LTE910CFX v1.00 operates in most 4G LTE bands globally and support fallback to 3G (HSPA+) and 2G network technologies.

North American “end device” certification allows users to implement the LTE910CFX in their devices with no further carrier certification requirements.*

* Verizon may require FOTA and data retry demonstration for full certification. FirstNet requires certification in the user end product.
