Embedded Cellular XF Footprint LTE910XF v8.00 CAT 4 Plug-In Modem

Description

The LTE910XF v8.00 CAT 4 Plug-In modem, based on the industry standard 20-pin connector footprint, is a PTCRB and Carrier end device certified LTE modem for use on CAT 4 networks globally.

Add robust cellular connectivity to your IoT devices with scalable radio technology with the standard industry 20-pin connector footprint line of modems including LE910 based LTE solutions. Extensive experience in designing and building embedded product solutions makes the LTE910XF v8.00 embedded cellular modem the smallest on the market. It supports multiple LTE bands and fallback capability minimizing costs of hardware and network access.

Incorporating the Telit LE910 penta band module, the LTE CAT 4 enabled Janus LTE910XF v8.00 is available for use on AT&T, T-Mobile, Verizon, Rogers, Bell, and Telus networks, as well as all other GSM networks worldwide. It is pin compatible with the full line of Janus XF Footprint Plug-In products.

Take the complexity out of designing cellular IoT solutions.
