Janus Remote Communications Announces AT&T Certification for their HSPA+ “Plug-In” Terminus

Aurora, IL — Janus Remote Communications, a world leader in the design and manufacture of M2M (machine to machine) communication products, announces that their HSPA910CF “common footprint” plug-in HSPA+ (3G) modems have achieved AT&T end product certification.

The HSPA910CF design, incorporating Telit’s HE910 penta-band radios, allows for communication on GSM/GPRS, EDGE, UMTS, or HSPA networks. The modems offer TCP/IP stack access via AT commands and full FOTA management capabilities. The 2.5” x 1.4” x 0.365” open frame “DIP Type” design has an operational temperature range of -30° to 85°C and an input voltage range of 4.75 to 5.25 Vdc. The Terminus HSPA910CF is ideal for use in fleet and asset management, security systems, telemetry, telematics, remote monitoring systems, remote meter reading, vending machines or any other M2M applications.

Adding to their highly successful line of cellular modems and terminal products, The Janus Plug-In Terminus modules allow users to quickly and easily add cellular connectivity to any existing or new applications. The common footprint design affords users the option to change between wireless networks as their communication needs change. And, the Plug-In Modem’s “end product certification” assists the user with a shortened AT&T Carrier certification experience.

Janus Plug-In Modems currently operate on the following networks: GSM/GPRS, CDMA, EDGE, UMTS, EV-DO, HSPA+ and Wi-Fi. For more information, or to order the HSPA910CF or any certified Janus devices, go to www.janus-rc.com

About Janus

Janus Remote Communications provides state-of-the-art wireless products and services as well as custom design solutions for the global M2M marketplace. Janus solutions are widely used by customers in the areas of asset, process, facility and energy monitoring and control; health, safety and security; and in a whole host of commercial products. Janus solutions span the six pillars of M2M; remote monitoring, RFID, sensor networking, smart services, telematics and telemetry. www.janus-rc.com. Janus is a division of The Connor-Winfield Corporation. www.conwin.com

Price: \$138.00 per unit at 1000 quantity
